

Analyze User Request:

Analyze User Request

Overview

Goal:* Validate user request analysis accuracy ≥ 95%.

Checkpoint:* 24 hours.

Kill Rule:* Stop if 3 iterations generate no revenue.

Boost Rule:* Prioritize if revenue ≥ \$1.

Clone Rule:* Duplicate if revenue ≥ \$50.

Distribution

****Channel:**** Owned-site (free website).

****Plan:****

- Host on venture's free website with SEO-optimized landing page.
- Share via social media, community forums, and email campaigns.
- Collect feedback via embedded form and direct email responses.

Maintenance

****Weekly:**** Content audit, minor updates, and A/B testing of landing page.

****Monthly:**** Review user feedback, iterate analysis logic, and analyze conversion rates.

User Request Analysis Template

1. ****User Input:**** [Paste user request here]

2. ****Key Details:****

- Intent: [e.g., "Buy product X"]
- Constraints: [e.g., "Budget \$100"]
- Timeline: [e.g., "Deliver in 2 weeks"]
- Priority: [High/Medium/Low]

3. ****Validation Checklist:****

- ☐ Clear intent identified?
- ☐ Constraints documented?
- ☐ Timeline feasible?
- ☐ Priority assigned?

4. ****Next Steps:****

- ☐ Propose solution if validated.
- ☐ Flag for review if unclear.
- ☐ Escalate if priority is high.

Example Analysis

User Input:* "I need a laptop under \$800 with 16GB RAM and 512GB SSD, and it must arrive by Friday."

Key Details:*

Intent: Purchase laptop.

Constraints: Price ≤ \$800, RAM ≥ 16GB, Storage ≥ 512GB.

Timeline: Deliver by Friday.

Priority: High.

Validation:*  All constraints met.

Next Steps:* Recommend compatible models and check shipping options.

Feedback Form

Embedded form with fields for: Accuracy rating (1-5). Missing details. Suggested improvements, and user satisfaction rating (1-5)

Additional Resources

****FAQ:**** Common user requests and expected responses.

****Glossary:**** Definitions of key terms (e.g., "Priority")

****Templates:**** Pre-filled examples for different request types
